

THE COMPLETE INTERNET EVERYWHERE SOLUTION

The Cloudcase Difference.

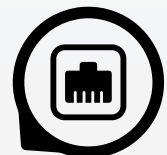

Wireless internet connectivity isn't new - we all carry internet enabled smartphones and even portable hot-spots and dongles in our pockets and bags now for connectivity on the go.

However, when you need reliable enterprise grade connectivity anywhere you need more. More powerful antennas, more than one SIM card, more connected devices and longer range on the Wi-Fi and more ways to quickly deploy, remotely manage and support devices in the field.

The Cloudcase is the easiest way to get more out of cellular internet connectivity for your construction site, holiday home, campervan, and business.

VOIP HANDSET
READY

DEVICES

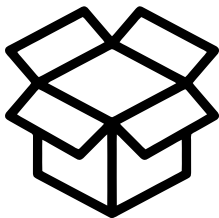

EASY CLOUD
MANAGEMENT

POWERFUL WI-FI &
LTE ANTENNAS

Everything Included

Our Cloudcase wraps an enterprise grade cellular router in a rugged enclosure with powerful LTE and WiFi antennas. Just plug in and go

More of Everything

More powerful antennas, more than one SIM card, more devices connected at more range on the WiFi and more ways to quickly deploy, remotely manage and support devices in the field.

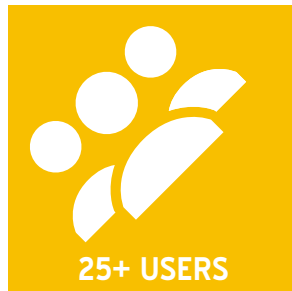

Cloud Managed Connectivity

With full cloud based monitoring, management and reporting, you know exactly what's happening on your network of Cloudcases, all the time - wherever they are.

RAPID MOBILE TEMPORARY

-  Get connected anywhere using cellular, public hotspots and even fixed line connectivity.
-  High gain cellular antennas combined with dual sims improve coverage and availability.
-  Support VoIP over 4G/LTE & 4G/LTE-A, including softphones & handsets
-  Connect PoS card readers and network printers.

SECURE | HIGH SPEED | RELIABLE | CONNECTIVITY

GET CONNECTED FAST

Cloudcases can be rapidly deployed and just plug in and work - no waiting for installations. No engineer needed.
