

# SpeedFusion Cloud

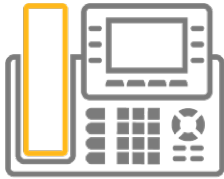

## Keep Your Connection Flowing

From video streaming to online collaboration, everything depends on consistent Internet. When your line goes down, it can take minutes or hours to recover. Even with a backup line, it could take 30 seconds for the router to reconnect... unless you have the SpeedFusion Cloud. SpeedFusion instantly switches between connections so there's zero downtime, opening up a wide range of possibilities.

## SpeedFusion Cloud Can:

### Protect Your VoIP Calls

Use a secondary Internet connection to get seamless call hand-off when your primary connection fails. Use Hot Failover to ensure your calls will remain uninterrupted.

### Protect your Credit Card Processing

Ensure that your PoS stays connected with a backup cellular connection. Never resort to using the credit card roller and filling out paper forms. Even if a line disconnects mid-transaction, Hot Failover will ensure that it will go through.

### Make Work From Home Work Great

Access shared files, cloud services, and videoconference as if you are still in the office. Use Bandwidth Bonding to make your Internet fast and unbreakable, use Bandwidth Overflow to minimise data costs, and use WAN Smoothing to make your video conferencing consistent.

### Give Road Warriors Smooth Connectivity

Securely connect to HQ using any connection, no configuration needed. Hotel Wi-Fi, cellular link, and landlines: connect with them all. Use WAN Smoothing to improve VoIP quality even when using a single WAN connection.

### Make Video Conferencing Unbreakable

Deliver clear and consistent video conferencing performance: stop playing 'guess the word' with your colleagues and students. WAN Smoothing will improve your streaming whether you have single or multiple connections.

### Connect Better to Cloud Services

Experience blazing fast uploads and downloads from Dropbox, OneDrive and Google drive. Enjoy fast and unbreakable access to Azure, AWS, and cloud-based SaaS providers. Use Bandwidth Overflow to minimise network costs.

## How it Works

We've hosted SFC nodes in public clouds all over the world. Your device builds a SpeedFusion connection with one of our nodes for unbreakable connectivity.

## SpeedFusion Cloud Plans

Product Code	Product Name	Usage	Speed	Validity
SFC-DP-TRIAL	SpeedFusion Cloud Free Plan	100 GB	50 Mbps	1 month
SFC-DP-TOP-B	SpeedFusion Cloud Top Up Plan B	500 GB	200 Mbps	6 months
SFC-DP-TOP-C	SpeedFusion Cloud Top Up Plan C	1 TB	200 Mbps	1 year
SFC-DP-TOP-D	SpeedFusion Cloud Top Up Plan D	2.5 TB	200 Mbps	1 year
SFC-DP-TOP-E	SpeedFusion Cloud Top Up Plan E	5 TB	200 Mbps	2 years
SFC-DP-TOP-F	SpeedFusion Cloud Top Up Plan F	10 TB	200 Mbps	3 years
